

This Week

The median list price in LOS ANGELES, CA 90035 this week is \$1,824,000.

Demand measured by the Market Action Index is increasing and days-on-market is trending downward. Even as more properties come available, these are positive trends for the market.

Supply and Demand

- The market has been cooling over time and prices plateaued for a while. Despite the consistent decrease in MAI, we're in the Seller's zone. Watch for changes in MAI. If the MAI resumes its climb, prices will likely follow suit. If the MAI drops consistently or falls into the Buyer's zone, watch for downward pressure on prices.

The Market Action Index answers the question "How's the Market?" by measuring the current rate of sale versus the amount of the inventory. Index above 30 implies Seller's Market conditions. Below 30, conditions favor the buyer.

Price

- Again this week we see prices in this zip code remain roughly at the level they've been for several weeks. Since we're significantly below the top of the market, look for a persistent up-shift in the Market Action Index before we see prices move from these levels.
