

This Week

The median list price in LOS ANGELES, CA 90045 this week is \$1,538,500.

Even though the days-on-market is trending higher, so is the Market Action Index at these inventory levels, providing a neutral outlook for the market.

Supply and Demand

- The market remains in a relative stasis in terms of sales to inventory. Prices have not been moving higher for several weeks. However, inventory is sufficiently low to keep us in the Seller's Market zone so watch changes in the MAI. If the market heats up persistently, prices are likely to resume an upward climb.

The Market Action Index answers the question "How's the Market?" by measuring the current rate of sale versus the amount of the inventory. Index above 30 implies Seller's Market conditions. Below 30, conditions favor the buyer.
